ITC-255 - Group Project - Certification Tracker

Topic: Coding

Group 5 Team members:

Nicole Brown

Amy Funk

Kyrrah Nork

Anu Slorah

Heetae Yang

Use Certification Tracker.

Try to take a basic proof of concept part of your program and code it. The classes and relationships should match classes in your diagram. Ideally the proof of concept, however small should run. (You do not have to implement all the methods in a class if those methods don't add to the proof.)

You can write this in the language of your choice (C#, Java, or python.) .
